

All year round conservatories

June or December, February or September.

Designed for year-round use, our conservatories enable you to add a unique and multifunctional room to your home.

A conservatory quickly becomes the hub of any home; the room that everyone wants to be in, the best seat in the house.

Cool when it's warm and warm when it's cool, it's no longer just a room for the summer, nor does it have a specific purpose. Teaming the views of the outdoors with the comfort and ambience of the indoors, a conservatory is the perfect venue for any occasion.

Conservatories

01 Doors

Our double doors are glazed using innovative thermally efficient glass so that added light and superb views do not come at the expense of insulation. Please ask about our range of door options.

02 Windows/Glazing

Glazed using innovative thermally efficient glass, our windows are 'C' rated as standard, with many achieving the much sought after 'A' rating. For full window options please ask for more details.

03 Size options

Whether to the floor or with a dwarf wall we will tailor your conservatory to suit your needs.

04 Roof options

With today's erratic climate we have options to keep your conservatory cool in the Summer and warm in the Winter. Both polycarbonate and self-cleaning glass provide excellent thermal properties.

05 Finishing

Cresting and finials, top capping, decorative finishes, fans, lighting - however you wish to personalise your conservatory, we'll be up to the task!

06 Reinforcing

Steel reinforcing gives added strength and durability to products that may be exposed to wild and erratic weather.

Images are for illustration purposes only. Energy ratings only apply to windows. Supplier reserves the right to alter specifications, options, and styles at their discretion.

VICTORIAN

Classical in appearance courtesy of a bay front and a steeply-pitched roof, the Victorian is a fitting complement to many types of property; old and new. An ornate ridge crowns the Victorian to add a touch of grandeur.

EDWARDIAN

For those who prefer simplicity; the Edwardian is simple, but very effective. The flat-fronted style allows for a square or rectangular shaped room which offers excellent internal floor space. Strong, bold lines bestow the Edwardian's contemporary appearance.

GABLE

Offering generous floor space, the Gable conservatory is made to seem even more roomy thanks to a high-pitched and flat-fronted roof. A gable conservatory is ideal when the size of the site does not allow for a Victorian or Edwardian style of roof.

LEAN-TO

Emulating the style of a Mediterranean sunroom, the Lean-to can be fitted in small or awkward spaces. The pitch of the roof is variable and a low-pitched lean-to conservatory is great for low buildings, such as bungalows.

BESPOKE

Not all homes and not all people are suited to the more traditional conservatory styles. For these people we offer the endless possibilities of the bespoke conservatory. P-shape, T-shaped, or any shape you can think of, we can design and manufacture a spectacular conservatory to suit you.
